

Sheth Karamshi Kanji English School

Primary Section

A team of university students from Japan - Ryoto and his friends, visited our school on Wednesday, 25th March 2026. They conducted an engaging presentation on OSOJI PROJECT, to help students understand the challenges of garbage management in the country and the important role children can play at the school level in addressing these issues.

“A small change can make a big difference in the world.”

Following the presentation, the visiting students interacted with children in their classrooms and actively participated in a classroom cleaning drive. Inspired by this initiative, the school has decided to implement a daily 5-minute cleaning session after recess to promote cleanliness, responsibility, respect and discipline among students. This will also help at instilling community values and teamwork.
